

Carp Lake Fisher Knowledge Survey

Liz Hirsch

February 16, 2023

Fishing trip information

1. What time did you start fishing today?
2. About how long do you think you'll spend fishing today?
3. Did you fish for burbot (lingcod) today?
4. Did you release or keep any burbot? How many?
 - Do any of your burbot have a tag that looks like this? [show example anchor tag]
 - Do you have any burbot that you'd let us measure today?
 - We're looking at the sizes and ages of burbot in Carp Lake and need burbot heads to estimate age. Would you be willing to give us any today?
5. What kind of fishing gear are you using today?
6. Roughly where on the lake did you catch your burbot? [from angler's answer, approximate in which Zone the burbot was likely caught]

Fishing activity at Carp Lake

1. About how many times do you fish for burbot at Carp Lake per year?
2. Were you aware that there is a burbot tagging program happening at Carp Lake? [if the person has questions, show them what a Floy tag looks like and explain how we've been tagging and releasing burbot with them]
3. Because we have so little information on burbot at this lake, we're trying to access fisher knowledge about burbot, and trying to figure out how to encourage fishers to share what they know. We're looking at different ways to get people involved in reporting the tagged fish they catch. The next few questions are about that:
 - Do you think people fishing at Carp Lake would report a tagged burbot by calling a phone number on the tag, if no reward is involved?
 - Do you think a reward of \$100 on the tag, awarded to you when you call the phone number, would encourage burbot reporting?
 - Do you think there are other ways of reporting a tagged burbot that would work better, or different incentives that would encourage reporting?

Observations of the burbot fishery

1. How long have you been fishing for burbot at Carp Lake?
2. Have you noticed any changes in burbot during the time you've been fishing at Carp Lake?
3. Are there any other changes you've noticed that you'd like to share?
4. Do you have any other questions about our project, concerns, or feedback?
